Checklist: Baseline Maturity

A quick self-check across the four LucidSeal principles.
This is not a quiz or a test - it's a conversation starter for boards, teams, and community leaders..

💡 **Tip for community use -** *This checklist works best when printed or shared in team/board packs. The goal is not to "score" but to spark discussion: What's working well? What's missing? What's next?.*

How to Use

- Review each principle as a group.
- Agree on a status for today.
- Capture reflections and next steps.
- Repeat every few months to track progress

Principle	Quick Check	Status	Notes / Next Step
Privacy	Do we only collect the data we genuinely need?	🔴 Not yet in place 🟠 Partially in place 🟢 Fully in place	
Transparency	Do we explain our practices in clear, human language?	🔴 Not yet in place 🟠 Partially in place 🟢 Fully in place	
Security	Do we patch and review access on a regular basis?	🔴 Not yet in place 🟠 Partially in place 🟢 Fully in place	
Community	Do we have an open way for stakeholders to raise concerns?	🔴 Not yet in place 🟠 Partially in place 🟢 Fully in place	

Why This Matters

- **Privacy** → Protecting people starts with collecting less.
- **Transparency** → Clear communication builds trust.
- **Security** → Small habits (like patching) prevent big problems.
- **Community** → Open pathways make people feel heard and safe.
